## Driver Fatigue

It is a common mistake to think that fatigue is just a lack of sleep. In fact, it is a complex condition that can be caused by a number of factors, including lack of sleep, long hours of work, and a diet of fast food. Fatigue can lead to a number of safety hazards, including:

- Decreased alertness and reaction time
- Impaired judgment and decision-making
- Increased risk of accidents and injuries
- Decreased productivity and efficiency

## Ergonomics

A014 - Tips for Office Ergonomics

These are basic rules that no operator whose conveyor is utilized should ignore. Adhering to these rules is the most cost-effective way to avoid all conveyor safety programs.

1. Do not operate a conveyor unless you have been trained and authorized to do so.
2. Do not touch any of the conveyor's moving parts.
3. Do not touch any of the conveyor's electrical components.
4. Do not touch any of the conveyor's control panels.
5. Do not touch any of the conveyor's emergency stop buttons.
6. Do not touch any of the conveyor's safety devices.
7. Do not touch any of the conveyor's warning devices.
8. Do not touch any of the conveyor's safety barriers.
9. Do not touch any of the conveyor's safety mats.
10. Do not touch any of the conveyor's safety lights.
